

What if your words could change a world?

Yume 夢 · a living Japanese-learning game

Speak Japanese.
Watch meaning become visible.

Built by Ronit for the Visko Orbis Challenge

Live world powered by
Orbis

Concept artwork · GPT Image 2.5 Sunburst on fal · not gameplay

Less guessing. More expressing.

I wanted Japanese practice where your words actually do something.

Concept artwork · GPT Image 2.5 Sunburst on fal · not gameplay

RECOGNITION

“Which answer is right?”

EXPRESSION

“How do I make it happen?”

Your Japanese is the next move.

An objective. Your words. Feedback. A change in the running world.

PARK OBJECTIVE

Put a cat in the park.

こうえんにねこがいます。

There is a cat in the park.

Meaning understood → Steer Orbis

Recording slot: replace with your real app demo later.

Then try again.

Wrong meaning → feedback only

Correct meaning → next scene change

3 guided worlds

Park · Classroom · Night City

4 difficulty levels

Single word → description

Learning support

Spoken narration · saved vocabulary

Language becomes a control signal.

A focused stack. One clear role for each layer.

The video is not decoration. It is the response.

The learner's next answer influences a world that is already running.

NOT THE EXPERIENCE

*Pick an answer.
Play a fixed clip.*

A predetermined visual result.

THE YUME LOOP

*Express a change.
Steer the live world.*

New input, interpreted turn after turn.

Japanese input

Meaning check

Live consequence

Real-time steering is part of the learning mechanic, not an extra effect.

Don't just learn the word. Give it a world.

Speak Japanese. Watch your words become reality.

*A dream you shape,
one sentence at a time.*

NEXT TO PROVE

Reliable live turns

Learner testing

Richer expression
